

Popular Electric Fencing Tape

Electric fencing tape is becoming more and more popular due to its durability and the ease of use for horse fencing tape or grazing areas where the fence needs to be moved frequently. Electric fence tape is a very cost effective way to protect your livestock and property while keeping animals contained to a specific area.

Today you can find all kinds of polytape on the market, however, how do you know which one will fit your situation. Here is a list of the most popular electric fencing tapes on the market to help you make an educated decision.

White 20mm Electric Fence Tape Doublepack perfect for strip grazing horse fencing and perimeter fencing. Specifications are 4 conductors, 1.8 Ohms/m resistance, and breaking strain 80 kg.

Farmer T20 Electric Fence Tape perfect for electric horse fencing. Specifications are 4 conductors, 1.8 Ohms/m resistance, and breaking strain 80 kg.

Farmer T40 Electric Fencing Polytape best used for short fences and horse paddocks. Specifications are 8 conductors, 5.4 Ohms/m resistance, and breaking strain 80 kg.

Hotstop / Ranger Superior Electric Fence Tape 20mm is a great polytape for medium to long electric fences offering UV stabilised plastic filaments. Specifications are 9 conductors, 3.4 Ohms/m resistance, and Breaking Strain 90 kg.

This is just a short list of the most popular electric tape available in the UK. You can find all kinds and a wide range of brands offering exactly what you need for your electric fence needs from horse paddock fences to rabbit fencing. The best way to ensure your livestock is safe from predators is by investing in products that work the best in all types of weather. Polytape is durable and is best used for temporary fencing; however, many individuals are adding polytape to their permanent fencing as an extra-added precaution. Horses need a highly visible fence due to the fact they are fast and may not notice a fence. An electric fence may do more harm to your horse if it runs into a hot fence. Using polytape will ensure your horse will see the fence and stay clear.

Electric tape is a cost effective way to electrify your fence without spending hundreds possibly thousands of dollars for polywire, polytwine, or wire for your fencing needs. You can always use both and save money by using strands of both instead of all wire. Use one or two strands of polytape along with other electric fencing needs to save money while providing the right amount of strands to keep your animals where they belong and predators at bay.

When you are ready to purchase electric polytape, you can always talk with an expert. They understand the need for cost effective materials when running a farm or ranch. They will be able to provide you with all the information you may need in order to choose the proper electric tape for your electric fencing needs.
